DARONE REAL ESTATE BROKERS LLC · DUBAI INDUSTRIAL CRM · VERSION 2.0 (V2)

Flutter Broker App (v2) — Complete Technical Architecture, Feature Walkthrough & Specification Compliance Report

Comprehensive documentation of all Version 2 (v2) modules, Branch 1 live backend journeys, mobile JWT authentication & 1-to-1 RBAC, 1:1 interactive finger-tracking swipe navigation, broker profile & photo center, domain engines, and 12 automated acceptance tests.

FRAMEWORK & RELEASE	CODEBASE FOOTPRINT	ACCEPTANCE SUITE	TARGET PLATFORMS
Flutter 3.24+ · Riverpod (v2.0)	22 Dart Files (~520 KB Code)	12 / 12 Tests Passing (100%)	iOS (PWA) · Android APK · Web

1. Executive Overview & v2 Clean Architecture Layout

The **DARONE Broker App (`broker-app/` v2)** is engineered specifically for Dubai's industrial real estate brokerage sector (Warehouses, Cold Storage, Labour Accommodation, Industrial Land Plots, Factory/Production Units, and Showrooms across JAFZA, DIP, DIC, Ras Al Khor, Al Quoz, and National Industries Park).

In **Version 2 (v2)**, the application unites full **Branch 1 Live Backend REST Integration** (Journey A: Leads & Common Pool, Journey B: Landlord Property Submissions, Journey C: Broker Requirements Board) with production **Mobile JWT Authentication (`/api/auth/mobile/*`)**, strict **1-to-1 Server RBAC role enforcement**, a dedicated **Broker Settings & Profile Photo Center**, **1:1 Interactive Finger-Tracking Horizontal Page Swipe & Nested Sub-Tab Edge Handoff**, a **3-Mode Brand Theme Engine (`System Auto` / `Midnight Navy Dark` / `Warm Ivory Light`)**, the custom-painted **`DaroneD1CrestLoader`**, and an isolated **Public Live Preview (`LIVE_PREVIEW_DEMO`)** for instant iPhone Safari & Android testing.

Layer / Module	File Path (under `broker-app/`)	Primary Responsibility & v2 Enhancements
App Shell, 1:1 Swipe & RBAC Navigation	`lib/main.dart`	Responsive shell (`NavigationRail` on desktop ≥880px, `NavigationBar` on mobile <880px), 1:1 finger-tracking horizontal page drag & snap, `550ms` directional slide transitions, Android `PopScope` tab back-stack, profile avatar pill, and offline-only outbox alert badge (`TECH05`).
Theme & Brand Design System (v2)	`lib/core/theme/darone_theme.dart`	Midnight Navy (`#0B162C`), Muted Gold (`#C5A059`), Warm Ivory (`#FBF9F5`), and Obsidian Dark (`#070E1B`) palettes with 3-mode persistence (`System Auto` , `Dark` , `Light`) and 44×44px touch targets (`UX04`).
Custom UX & Brand Widgets (v2)	`lib/core/widgets/darone_ux_components.dart`	Official circular `DaroneCrestLogo` (`assets/images/darone_crest.png`), custom-painted `DaroneD1CrestLoader` rotating gold arc around the `D1` monogram, and 3-way `DaroneThemeModeSelector` .
Core Engines	`lib/core/utils/dubai_time_and_money.dart`	`DubaiTimeHelper` (`UTC` storage + `Asia/Dubai` display),

Layer / Module	File Path (under `broker-app/`)	Primary Responsibility & v2 Enhancements
(Time, Area, Money, Crypto)		`IndustrialUnitConverter` (`sq m ⇔ sq ft` with separate Yard), `DaroneCommissionEngine` (exact `Decimal` math), and `ViewingSnapshotHasher` (`SHA-256`).
GraphQL & Offline Sync Contract	`lib/core/graphql/darone_graphql_schema_and_client.dart`	GraphQL SDL schema, queries/mutations with `Idempotency-Key` headers (`OP05`), and SQLite offline outbox queue definitions (`TECH05`).
Domain Models	`lib/domain/models/broker_models.dart`	18+ strongly typed immutable domain models & enums covering Contacts, Leads, Pool, Industrial Properties, Sub-Units, Vault Docs, Viewings, Splits, Deals, Roles (including `branchManager`), and Audit Events.
Auth, JWT Session & RBAC Provider (v2)	`lib/data/providers/auth_session_provider.dart`	Live mobile JWT auth (`/api/auth/mobile/login` , `/signup` , `/refresh` , `/logout` , `/me` , `/password-reset`), `flutter_secure_storage` token persistence, 1-to-1 server role mapping (`ACL02`), profile photo & notification persistence, and `LIVE_PREVIEW_DEMO` quick role sign-in.
Branch 1 Live Intake Provider (v2)	`lib/data/providers/branch1_intake_provider.dart`	Live REST client & Riverpod state notifier for Journey A (`/api/leads/` & `/api/leads/pool/`), Journey B (`/api/property-submissions/`), and Journey C (`/api/requirements-board/`) with unified `API_BASE_URL` .
Broker Workspace State	`lib/data/providers/broker_app_state.dart`	Central Riverpod `StateNotifier` managing Leads, SLAs, Personal Reminders, Pool Claims, Inventory, Sub-Unit Holds, Viewings, Collaborations, Deals, Offline Outbox, and Audit Log.

Feature Screens (12 Screens in v2)	`features/auth/auth_flow_screens.dart`
	`features/today_agenda/today_agenda_screen.dart`
	`features/leads_and_pool/leads_and_pool_screen.dart`
	`features/leads_and_pool/branch1_intake_screens.dart`
	`features/leads_and_pool/lead_detail_screen.dart`
	`features/inventory/industrial_inventory_screen.dart`
	`features/inventory/property_detail_screen.dart`
	`features/matching_collab/matching_and_collab_screen.dart`
	`features/viewings_signature/viewing_signature_kiosk_screen.dart`
	`features/deals_commissions/deals_and_commissions_screen.dart`
	`features/approvals/team_approvals_inbox_screen.dart`
	`features/settings/settings_and_profile_screen.dart`
		Complete interactive workflows for Mobile JWT Auth & Pending Approval Gate, Daily Execution, 4-Tab Leads & Branch 1 Field Journeys (A, B, C) with Nested Swipe Edge Handoff, Industrial Inventory & Sub-Units, Explainable Matching, Tablet Viewing Kiosk Signatures, Decimal Commission Ledger, Team Approvals, and Settings & Profile Photo Center.

Acceptance Tests (12 Suites)	`test/darone_broker_acceptance_test.dart`	12 automated acceptance & server-alignment tests verifying `SEC01` , fail-closed offline auth, 1-to-1 server role mapping, unified `API_BASE_URL` , `AT17` , `AT13/COMM10` , `COMM05` , `PROP02` , `PROP11/DEAL04` , `ASST02/AT06` , `POOL05/09` , and `VIEW05/08` .

2. What's New in v2 — Major Architectural & UX Upgrades

2.1 Branch 1 Live Backend Integration — Three Field Journeys (`branch1_intake_provider.dart`)

NEW IN V2 LEAD01–09 POOL01–11 INV03

- **Journey A — Leads & Common Pool (`/api/leads/` , `/api/leads/pool/`):** Live buyer/tenant requirement intake (`POST /api/leads/`), contact & stage progression logging (`POST /api/leads/{id}/contact/`), Team Leader / Manager lead assignment (`POST /api/leads/{id}/assign/`), and atomic Common Pool claiming (`POST /api/leads/pool/{id}/claim/`).
- **Journey B — Landlord Property Submissions (`/api/property-submissions/`):** Field broker intake for new landlord/seller industrial properties (`POST /api/property-submissions/`) and Team Leader / Branch Manager / Admin approval or rejection workflow (`POST /api/property-submissions/{id}/review/`).
- **Journey C — Broker Requirements Board (`/api/requirements-board/`):** Internal collaborative requirement postings (`POST /api/requirements-board/`), Team Leader moderation (`approve` / `reject`), and cross-broker property match responses (`POST /api/requirements-board/{id}/respond/`).

2.2 Production Mobile JWT Auth & 1-to-1 Server RBAC Alignment (`auth_session_provider.dart`)

NEW IN V2 SEC01 ACL01–08 ADMIN04

- **Live Mobile JWT Endpoints:** Integrated with `/api/auth/mobile/login` , `/api/auth/mobile/signup` , `/api/auth/mobile/refresh` , `/api/auth/mobile/logout` , `/api/auth/mobile/me` , and `/api/auth/mobile/password-reset` .
- **Encrypted Token Storage & Auto-Refresh:** Stores access and refresh JWTs in `flutter_secure_storage` and automatically rotates expired access tokens on `401` responses.
- **Pending Admin Approval Gate (`202 Accepted`):** Handles `ACCOUNT_PENDING_APPROVAL` on staff signup with a dedicated pending-approval status screen until an administrator activates the account.
- **Strict 1-to-1 Server Role Mapping & Fail-Closed Auth:** Enforces server-assigned roles (`admin` , `branch_manager` , `team_leader` , `agent` , `marketing` , `accounts`) with client-side role switching removed and fail-closed error handling when the server is unreachable.

2.3 Broker Settings, Profile Photo Upload & Security Center (`settings_and_profile_screen.dart`)

NEW IN V2 ADMIN04 SEC01 ACL08

- **Profile Photo Upload & Camera Capture:** Brokers can tap the circular avatar or its gold camera badge (`Icons.camera_alt_rounded`) to upload a photo from the gallery, capture a photo with the camera (`image_picker`), or remove the current photo. Persisted locally and rendered across the top `AppBar` broker pill, the `More` sheet header, and the Settings banner.
- **Personal & RERA Credential Editor (`ADMIN04`):** Edit Full Name, Work Email, Mobile/WhatsApp Number, RERA Broker Licence Number (`BRN`), Primary Branch Office, and Industrial Specialization.
- **Granular Notification & App Preferences:** Dedicated switches for Urgent SLA Countdown Alerts (`OP06`), Common Lead Pool Broadcasts (`POOL05`), Manager & Team Leader Approval Alerts, and Tactile Haptic Feedback.
- **Password Change & Active Device Session Revocation:** In-app password update workflow, connected device session list with remote token revocation, and one-tap `/api/auth/mobile/me` profile synchronization.

2.4 1:1 Interactive Finger-Tracking Swipe, Brand Theme Engine & Live Preview

NEW IN V2 UX01–04

- **1:1 Finger-Tracking Horizontal Page Drag & Snap:** Swiping horizontally across the primary tabs (`Today` ↔ `Leads` ↔ `Inventory` ↔ `Matching`) tracks the user's finger 1:1 across the screen in real time, rendering the current and adjacent screens side-by-side before snapping smoothly (`30%` threshold or flick velocity).
- **Nested `Leads` Sub-Tab Edge Handoff (`_OuterDragLockScrollPhysics`):** Inside **Leads**, horizontal swipes move through the 4 sub-tabs (`Journey A` → `Journey B` → `Journey C` → `CRM Pipeline & SLA`) and automatically hand off to **Today** or **Inventory** at the outer edges.
- **3-Mode Theme Engine & Custom `DaroneD1CrestLoader` :** Instant switching between *System Auto*, *Midnight Navy Dark (`#0B162C`)*, and *Warm Ivory Light (`#FBF9F5`)*, paired with the official circular **DAR ONE** crest and custom-painted rotating gold arc `D1` loader.
- **Isolated Public Live Preview Mode (`LIVE_PREVIEW_DEMO`):** Built with `--dart-define=LIVE_PREVIEW_DEMO=true` for the GitHub Pages iPhone/Android preview so reviewers can tap **1-Tap Quick Preview Sign-In** role pills (`Sultan · Company Owner`, `Branch Manager`, `Team Leader`, `Industrial Broker`), while defaulting to `false` in production builds.

3. Core Domain Engines & Foundation Utilities (`lib/core/`)

3.1 Exact Fixed-Point Commission Engine (`DaroneCommissionEngine`)

COMM05 COMM10 AT13

Implemented in `lib/core/utils/dubai_time_and_money.dart` using the Dart `decimal` package. Floating-point (`double`) numbers are completely banned from financial and commission calculations.

- **Zero VAT Leakage (`COMM05`):** UAE 5% VAT is calculated strictly on the Gross Brokerage Fee for invoicing (`AED 100,000 × 5% = AED 5,000.00` , Total Invoice = `AED 105,000.00`) and is **never** shared into agent commission splits.
- **Verified `COMM10 / AT13` Benchmark:** Gross Fee = `AED 100,000.00` , External Share = `AED 20,000.00` → Net Internal Base = `AED 80,000.00` → 50% Agent Share = `AED 40,000.00` → Company Retained = `AED 40,000.00` .
- **Over-Allocation Guard:** Throws a hard validation error if internal agent split percentages exceed `100%` or if external share exceeds Gross Fee.

3.2 Industrial Area Converter, Server Time & Cryptographic Viewing Hasher

PROP02 TECH06 VIEW05 AT10

- **Industrial Area & Strict Yard Separation (`IndustrialUnitConverter` / `PROP02`):** Uses exact factor `1 sq m = 10.7639104 sq ft` . Total Built-Up Area (`totalBuaSqft`) is computed strictly as `Ground Floor + Mezzanine + Office` ; External Yard area (`yardAreaSqft`) is stored separately and never added to BUA.
- **Authoritative Server Time (`DubaiTimeHelper` / `TECH06`):** Stores all timestamps in UTC and converts to `Asia/Dubai (UTC+04:00 / GST)` for display, comparing SLA countdowns against `authoritativeServerNowUtc` .
- **Cryptographic Viewing Snapshot Hasher (`ViewingSnapshotHasher` / `VIEW05`):** Computes a deterministic `SHA-256` integrity hash over the viewing ID, property reference, frozen asking price at the moment of viewing, signatory name/capacity, UTC timestamp, and vector signature strokes.

4. Screen-by-Screen Feature Walkthrough (12 Screens in v2)

Screen 1: Responsive Workspace Shell & 1:1 Swipe Engine (`lib/main.dart`) UX01 UX02 UX04 TECH05

- **Adaptive Navigation:** Renders an 8-destination `NavigationRail` on Tablet/Desktop (≥880px) and a **5-Item Bottom** `NavigationBar` on Mobile Phones (`Today` , `Leads` , `Inventory` , `Matching` , plus a `More` bottom sheet for `Viewing Kiosk` , `Deals & Commissions` , `Approvals Inbox` , and `Settings & Profile`).
- **Polished Mobile Top Header:** Features the compact `DAR ONE` gold emblem pill, a widened broker identity & server role pill with live profile avatar, and an offline-only outbox warning badge (hidden when online for a clean header).

Screen 2: Authentication, MFA & Pending Admin Approval Gate (`auth_flow_screens.dart`) SEC01 ACL01–08 ADMIN04 AT17

- **6 Complete Auth & Security Stages:** (1) Corporate Email/Password Sign-In with 5-attempt brute-force lockout (`SEC01`), (2) 6-Digit TOTP MFA Verification, (3) Staff Onboarding Registration (`/api/auth/mobile/signup`), (4) **Pending Admin Approval Screen (`ACCOUNT_PENDING_APPROVAL`)**, (5) Password Reset Flow, and (6) Emergency Session Revocation & Local Cache Wipe (`AT17`).

Screen 3: Today Agenda & Daily Execution View (`today_agenda_screen.dart`) UX01 OP06 ASST01–06 AT06 SEC03

- **Single-Screen Daily Execution:** Combines Urgent Lead SLA Deadlines (`OP06 / LEAD05`), Personal Assistant Reminders that snooze independently without altering immutable Lead SLAs (`ASST02 / AT06`), Today's Multi-Property Viewing Agenda, Offline Sync Outbox (`TECH05`), and the Immutable Audit Trail Feed (`SEC03`).

Screens 4, 5 & 6: 4-Tab Leads Hub, Branch 1 Journeys (A/B/C) & Lead 360° Detail V2 UPGRADE DATA01–07 LEAD01–09 POOL01–11

- **4-Tab Unified Hub (`leads_and_pool_screen.dart` & `branch1_intake_screens.dart`):**
  1. **Tab 1 — Journey A (Leads & Common Pool):** Live lead creation, contact attempt logger, Team Leader assignment modal, and one-tap Common Pool claim.
  2. **Tab 2 — Journey B (Property Submissions):** Field landlord property submission form and Manager/Admin approve/reject review sheet.
  3. **Tab 3 — Journey C (Requirements Board):** Collaborative broker requirement postings, Team Leader moderation, and colleague property match responses.
  4. **Tab 4 — CRM Pipeline & SLA:** Contact vs. Requirement separation (`DATA07`), 3 independent SLA clocks (`LEAD05`), WhatsApp tap compliance guard (`COMMS04`), Pool Protection (`POOL07`), and 9-stage Lead 360° drill-down (`lead_detail_screen.dart`).

Screens 7 & 8: Industrial Inventory, Multi-Unit Holds & Property 360° Vault PROP01–11 INV01–09 ACL04 DEAL04 PUB05

- **Industrial Spec Precision (`industrial_inventory_screen.dart` , `property_detail_screen.dart`):** Supports Warehouses, Cold Storage, and Labour Camps with explicit `NULL (Unverified)` power handling (`OP07`), 14-day stale listing reconfirmation (`INV06`), Landlord Contact Privacy Masking on colleague listings (`ACL04`), Multi-Unit Bay Reservation Holds blocked when offline (`PROP11 / DEAL04`), and a 5-Category Document Vault (`PROP10 / PUB05`).

Screens 9, 10, 11 & 12: Matching, Viewing Kiosk, Commission Ledger, Approvals & Settings `MATCH01–05` `VIEW01–10` `COMM01–10` `ACL06–07`

- **Screen 9 — Explainable Matching & Splits (`matching_and_collab_screen.dart`):** Flags `NULL` power as a shortfall when power is required (`MATCH02 / AT09`), supports 50/50 colleague split requests (`MATCH03–05`), and generates frozen authority fee & VAT snapshots (`DOC02–06`).
- **Screen 10 — Tablet Viewing Signature Kiosk (`viewing_signature_kiosk_screen.dart`):** Full-screen Client Kiosk Mode (`VIEW03`), attendance-only legal disclaimer (`VIEW04`), finger/stylus signature pad with frozen `SHA-256` hash (`VIEW05 / AT10`), and honest offline queue status (`VIEW08 / AT11`).
- **Screen 11 — Deals & Decimal Commission Waterfall (`deals_and_commissions_screen.dart`):** Strictly separates Forecast vs. Signed vs. Collected KPIs (`PERF03`), tracks 6 deal milestones (`DEAL05`), and provides a live `Decimal` commission testbench (`COMM10 / AT13`).
- **Screen 12 — Team Approvals Inbox & Settings Center (`team_approvals_inbox_screen.dart`, `settings_and_profile_screen.dart`):** Role-gated inbox for Team Leaders, Branch Managers & Admins with Before/After diff cards (`ACL06`) and Maker-Checker self-approval blocks (`ACL07`), plus the comprehensive **Settings & Profile Photo Center**.

5. Complete Master Specification Compliance Matrix

Every rule family from the DARONE System Architecture & Operational Specification is enforced and traceable to specific code modules:

Rule Domain	Rules Covered	How the Built Flutter App (v2) Adheres to These Rules
Core Operating Principles	`OP01–OP07`	Company data ownership acknowledgement on onboarding (`OP01/04`); immutable `sourceAgentId` separated from `servicingAgentId` (`OP02`); append-only audit log (`OP03`); idempotent offline mutation keys (`OP05`); server-authoritative SLA clocks (`OP06`); unknown power stored as `null` , never `0` (`OP07`).
Roles, JWT Auth & Privacy	`ACL01–ACL08`	6 distinct server-mapped roles including `branch_manager` (`ACL01/02`); strict owner contact masking on colleague listings (`ACL04`); Before/After diff approval cards (`ACL06`); Maker-Checker self-approval block (`ACL07`); admin-approved signup gate & remote device token revocation (`ACL08`).
Data Model & Contacts	`DATA01–DATA07`	Normalized phone/email fields, multi-role contact tags (`Tenant` , `Decision Maker` , `Landlord`), unified chronological activity timeline (`DATA06`), and one Contact linked to multiple simultaneous Requirement Leads (`DATA07`).
Lead Management, Pool & Branch 1	`LEAD01–LEAD09` , `POOL01–11`	Live REST intake & pool claiming (`/api/leads/` , `/api/leads/pool/`), 9-stage pipeline stepper (`LEAD02`), 3 independent SLA clocks (`LEAD05`), masked pool contacts until claimed (`POOL04`), atomic online-only claim preserving `sourceAgentId` (`POOL05/09/10`), and mandatory Closed-Lost modal (`LEAD09`).
Personal Assistant Reminders	`ASST01–ASST06`	Custom broker reminders on Today screen (`ASST01`); snoozing a personal reminder never alters the underlying Lead SLA deadline (`ASST02 / AT06`); completing a reminder logs an activity outcome note (`ASST03`).
Industrial Property Master & Lifecycle	`PROP01–11` , `INV01–09` , `PUB05`	Live landlord property submissions & manager review (`/api/property-submissions/`), all 6 industrial categories (`PROP01`), exact `sq m ⇔ sq ft` converter with External Yard excluded from BUA (`PROP02`), 14-day stale listing detection (`INV06`), 5-category Document Vault (`PROP10`), and single-bay binding reservations (`PROP11`).
Explainable Matching & Req. Board	`MATCH01–05`	Live Broker Requirements Board & match responses (`/api/requirements-board/`), Fit vs. Shortfall breakdown per property (`MATCH01`), `NULL` power flagged as non-compliant for power-required leads (`MATCH02`), and colleague split requests with masked owner details (`MATCH03–05`).
Viewings, Kiosk, Deals & Commissions	`VIEW01–10` , `DEAL01–08` , `COMM01–10`	Client Kiosk mode hiding internal CRM data (`VIEW03`), frozen `SHA-256` signature certificate (`VIEW05`), honest offline signature queueing (`VIEW08`), 6 deal milestones (`DEAL05`), and exact fixed-point `Decimal` commission waterfall with 5% UAE VAT isolation (`COMM05/10`).
Security, Tech, Settings & UX	`SEC01–04` , `TECH01–06` , `UX01–04` , `ADMIN04–06`	5-attempt brute-force lockout (`SEC01`), encrypted JWT storage, 1:1 finger-tracking horizontal swipe & nested sub-tab handoff (`UX02`), 3-mode theme selector, profile photo camera/gallery upload & RERA BRN editor (`ADMIN04`), and emergency agent exit cache wipe (`ADMIN05 / AT17`).

6. Automated Verification & Acceptance Test Suite (12 / 12 Passing)

Executed via `flutter test test/darone_broker_acceptance_test.dart` — all **12 automated acceptance & server-alignment tests** pass in under 1 second:

#	Spec / Rule Codes	Automated Test Assertion	Status
1	`SEC01`	5 consecutive failed login attempts from the server trigger brute-force account lockout and block further login attempts.	PASSED
2	`SEC01 · TECH05`	Fail-closed authentication: an offline or unreachable server never signs in and surfaces a clear server connection error.	PASSED
3	`ACL01 · ACL02`	Server assigns 1-to-1 roles (`admin` , `branch_manager` , `team_leader` , `agent`) directly from `/api/auth/mobile/login` without client-side role	PASSED

#	Spec / Rule Codes	Automated Test Assertion	Status
		switching.	
4	`TECH01`	Production configuration defaults `USE_BRANCH1_MOCK` to `false` and unifies `API_BASE_URL` across Auth and Branch 1 providers.	PASSED
5	`AT17 · TECH05 · ADMIN05`	Simulating Agent Exit / Suspension immediately revokes the active session and wipes the local offline outbox queue to 0 items.	PASSED
6	`AT13 · COMM10`	Exact `Decimal` Commission Calculation (`AED 100k` Gross, `20k` External, `50%` Split → `40k` Agent, `40k` Company, `5k` VAT) passes with zero float drift.	PASSED
7	`AT13 · COMM05`	Over-allocating internal agent splits above 100% of the Net Internal Base throws a hard `ArgumentError` validation exception.	PASSED
8	`PROP02`	Industrial unit conversion (`sq m ↔ sq ft`) is exact and External Yard area is never added into Total Built-Up Area (BUA).	PASSED
9	`PROP11 · DEAL04`	Placing a binding reservation on one warehouse bay locks only that bay (leaving sibling bays open) and is blocked when offline.	PASSED
10	`ASST02 · AT06`	Snoozing a personal assistant reminder advances only the reminder timestamp and never alters the underlying Lead SLA deadline.	PASSED
11	`POOL05 · POOL09 · AT05`	Claiming a pool lead is blocked when offline; claiming online atomically transfers servicing ownership while preserving original `sourceAgentId` .	PASSED
12	`VIEW05 · VIEW08 · AT10 · AT11`	Capturing a tablet viewing signature while offline generates a frozen `SHA-256` hash and queues in the outbox without falsely showing "Sent".	PASSED
